

Ceramix[®]
ADDICTED TO INNOVATIONS

Design can be art,
Design can be aesthetics,
Design is so simple,
that's why it is so complicated.

Timeless designs &
enduring craftsmanship.
Let *Ceramix*[®] inspire you;
discover our extensive range
of products for your dream bathroom.

OUR VISION

The first and foremost aim of Ceramix is satisfaction of the end user. The company's future plans include new ranges in bath fittings, in tune with modern tastes and preferences. Also, a better insight into the customer's requirement to introduce better and user friendly products.

INTRODUCTION

In 1989 a vision was translated into reality. The year when Ceramix Faucets (India) was inceptioned. Ever since, the brand Ceramix has come of ages and is soaring high. We are leading manufacturer, supplier and exporter of bathroom faucets and accessories. **By sticking to the quality first rule, we are already exporting 40% of our products to Europe, Asia and Middle East and have a dealer's network across India.** Our range of products include:

- Bathroom plumbing fixtures
- Bath Accessories
- Zinc wash basin brackets and handles
- Multi-function Rain-showers & Shower Arms

Su-Dhara's ultra modern R&D with highly skilled engineers incessantly toil to usher in new, innovative, easy to use and easy to maintain good looking product ranges for every class & segment. Besides carving a niche, Su-Dhara's Total Quality Management has made it a name to reckon with. All along, the devoted professionals derived from the best of the industry are the invaluable assets of the organization. Company's focused approach in various fields : Planning, Manufacturing & Administration ensures enviable position among its peers. For Su-Dhara's, tomorrow looks more promising. All our products are designed and manufactured in-house thus ensuring strict quality control and maintaining the consistency of its product. To be one of the leading brands in the world with the greatest appeal, fascinating customer relevant innovation and breath taking designs.

FASHION ISN'T JUST ABOUT CLOTHES IT'S A LIFE STYLE

DESIGN | QUALITY | TECHNOLOGY

All our products are designed and manufactured in-house thus ensuring strict quality control and maintaining the consistency of its product.

DESIGN | QUALITY | TECHNOLOGY

DESIGN-RESEARCH & DEVELOPMENT

Make it simple yet significant the CAD/CAM equipped design studio uses the latest softwares to carry out designing functions and define technical specifications.

FOUNDRY

The selection of alloys and the experiences of our moulding technicians are essential to achieve the finished product of great quality. Only brass inglots of defined compositions are used to ensure quality & durability.

FINISHES AVAILABLE

MACHINING & POLISHING

Machining is done on CNC lathes ensuring accuracy and consistency. The preparation of products using automatic controlled systems reduces tedium and concentrates the expertise of the employees on the complex aspects.

PLATING

While complying with the most constraining environmental standards, we achieve to finish our products according to the desires of our customers by using the three layer electroplating technique thus increasing longevity and providing superior finish.

INNOVATION

CERAMIX has always believed in the power of innovation. Innovation is what drives technological advancement, leading to quantum leaps forward in functionality and durability. We have a team of people dedicated to developing product ranges that innovate in their form and function. We design products that not only look great but are easy to install, maintain and minimize environmental impact.

EasyMove

Ensures a lifetime of maintenance free comfort and reliability, precise temperature adjustment, this is a good example of design and technology fusing to bring you an enhanced water experience

StarPlating

Lustrous, mirror-like sheen that is soil repellent, scratch resistant and non-tarnishing, ensures a color-fast, good-as-new appearance for years to come.

EcoCare

Option to minimize consumption naturally integrated, consumes less water and energy.

Whisper

Extremely quiet, ensures that there is no irritating noise of water hammering.

ZeroDrip

All the faucets are guaranteed to be drip free.

WATER SAVING MADE FOR RESPONSIBLE LUXURY

CERAMIX has a passion for creating products that give the ultimate bathing experience yet use water sustainably.

save water

Our flow regulators are designed to regulate and control the flow of water to taps and showers without hampering the performance or the design of the product.

EVERY DROP COUNTS, MAKE EVERY DROP MATTER

save the planet

We all want to try and do what we can to help protect the environment. Because this world is our and we live here. Be conscious, preserve water, preserve air quality and conserve energy.

This can only be good for the planet.

ECO LITE

Quarter Turn with Foam Flow

With its gentle, flowing lines, the **ECO LITE** evokes a clean, modern aesthetic that creates a sense of serenity which we believe is the utmost requirement. When stepping into a restroom, you don't need the brightness the most but the sophistication so that you can feel your time, your me-time.

CONSUMER GUIDELINES

Consumer satisfaction is our basic motto, our objective and our belief with **CERAMIX** products.

It is our aim to maintain direct link with ultimate consumers, educating them about product quality, convenience of operation and usage and also preventive maintenance measures required at the consumers end.

The following guidelines, when followed by plumbers & consumers, ensure optimum and trouble-free performance of our products for years to come.

- Supply pipelines should be laid straight and vertical keeping the number of joints to a minimum-keeping the number of bends/elbows etc also a minimum possible to avoid restriction to flow of water.
- Supply lines must have vent pipes for removing air-locking in the water supply lines so as to get smooth flow water through the fittings.
- Flush all pipe lines before starting installation of metal fitting so that dirt and other foreign particles should not spoil the metal fittings.
- All tiling work should be fully completed before installing metal fitting.
- To protect the finished taps and fitting from dirt, stains and other damages, cover them with polypack/cloth after their installation till they are put to actual use.
- Clean the aerator at regular intervals of time for free flow of water from the fitting. Weekly cleaning may be better.
- Please buy **CERAMIX** products from authorized dealers only to ensure genuine quality material.
- To retain the original shine & sparkle, **CERAMIX** fittings needs a certain amount of care.
- Don't use aggressive cleaning agents, since these may spoil the finish of your **CERAMIX** fittings.
- Don't use salt or vinegar based cleaning agents to remove scale or scale related agents.
- Clean the **CERAMIX** fitting with mild soap lather for chrome plated surfaces.

How to remove aerator on
the faucet for cleaning
